

Job Description – **Senior Composite Design Engineer**

MGI Engineering Ltd is looking for a **Senior Composite Design Engineer** to join our highly skilled team to deliver cutting-edge solutions in the aerospace, automotive, motorsport and marine sectors. MGI Engineering is accelerating the creation of technologies towards a net carbon zero future.

Founded in 2003 by our CEO Mike Gascoyne, MGI Engineering has circa 20 full-time engineering staff based in Witney, Oxfordshire, delivering innovative technology solutions to wider mainstream and newly developing industry sectors. We are a very dynamic team with many exciting clients and projects. We pride ourselves on having a can-do attitude.

The technical team leverages its extensive experience in the F1 industry to deliver customised, highly innovative solutions to meet our client's specific requirements within different sectors. Our DNA is rooted in extensive, fast-paced R&D development, on-time and within-budget delivery, and reliance on a trusted international network of partners and specialists. We believe in sustainability, mobility and reusable energy technology across all our supported sectors.

The ideal candidate will be skilled in CAD modelling NX or Catia preferable and Detail Design of both Composite and Metallic components for aircraft, vehicle and other sectors.

Reporting to the CEO, this position will involve:

- Design and CAD modelling of composite components.
- Analysing and interpreting customer requirements.
- Preparation of detail designs and laminate books.
- Interaction with Aerodynamic and Stress departments to ensure full compliance with concept intent and structural integrity.
- Continuous development of designs and process to keep best practices.
- Fully compliant with the company quality standards AS 9100D.
- Lead and mentor junior designers to ensure company standards are achieved.
- Supporting the Test team as required to explore and validate technical solutions.

Basic Qualifications / Experience:

- Educated to Minimum HND level /Mechanical Engineering or equivalent.
- At least 10 years of experience working in a relevant industrial environment.
- A sound knowledge of computer aided design preferably NX11.
- Understanding of manufacturing techniques of composite components and tooling.
- Ability to apply your knowledge to solve fundamental engineering solutions.
- Experienced user of CAD surfacing tools and procedures.
- Ability to communicate complex ideas so that they are understood by different audiences.
- Fluent in spoken and written English language.

Preferred Qualifications/Experience:

- Experience working with multiple types of vehicle, including aircraft and automotive, including motorsports.
- Proficient user of NX or Catia V5 or V6.

- Previous experience in leading a small team or project is essential.
- Hands-on experience with composite materials.
- Knowledge and experience of pre-preg and infusion laminating techniques.

Benefits:

- Competitive salary
- 25 days holiday + bank holidays
- Flexible benefits scheme
- Free Breakfast
- Birthday day off
- Flexible working hours

Contract hours:

Full time

Primary location:

Witney, Oxfordshire

Salary:

Competitive
